CAREER EXPLORATION REPORT

Self-assessment is the first step in the career planning process. It can be a valuable tool for clarifying career direction, assisting in career transition and capitalizing on innate preferences that contribute to job satisfaction and success.

Your results have been generated from your responses to The Birkman Method® assessment. This comprehensive assessment measures behavioral traits, motivation, stress and occupational interests. The Birkman Method is backed by over 60 years of research and application.

Your Career Exploration Report is designed to give you a deeper understanding of yourself and the career options that are your best fit. Your report can help confirm career choices you are making, show you alternative career choices and build your personal awareness of the strengths, motivators and working environments that will help you succeed.

As you review your results, do not let them limit your career exploration. Rather, use your results as a guide for further exploring different career options that hold the highest potential for your success and well-being. With the assistance of a qualified career professional, you can develop career strategies and techniques to achieve your career goals.

CAREER EXPLORATION REPORT

You are unique. Your interests and behaviors define who you are and tell you how you are motivated. Imagine the possibilities if you were able to clearly communicate not only your skills, but also your most effective behavior for elevated performance.

The Birkman Career Exploration Report examines your relational characteristics from multiple angles and uses that information to highlight key career areas that will provide you with the greatest potential for success.

The first portion of your report explores four important dimensions of who you are:

Birkman Interests

What you like; activities you prefer

Usual Behavior

How you relate to the world around you; the behavior other people see

Needs

The support you need from others and the environment around you

Stress Behavior

Negative, reactionary behavior when frustrated and your needs are not met

CAREER EXPLORATION REPORT

THE COLORS OF THE BIRKMAN METHOD

To help simplify information, the Career Exploration Report uses colors throughout each area. This is to help you identify your own characteristics and also understand the differences that exist with each area. Since every individual is different, it is unlikely that you will see one color consistently throughout your report. Your unique color combination is the most important as it describes your unique attributes and provides a roadmap to reach your greatest potential.

NEEDS

SUPPORT NEEDED FROM ENVIRONMENT AND OTHERS

Our Needs are a vital part of who we are, and perhaps the most important aspect of our personality. Our Needs describe how we want to be treated, supported and motivated. Our Needs must be met in order for us to exhibit our Usual Behavior.

Your Needs indicate that you prefer:

- Friendly, yet casual relationships
- Specific direction and control
- Demanding projects
- Defined scheduling

Needs in the Yellow quadrant include:

- Encourage an organized approach
- Permit concentration on tasks
- Offer an environment of trust
- Be consistent

To access these attributes within an organization, ask questions such as:

- How dynamic is the working environment? does change occur often?
- Are there set policies and procedures in place for operating?
- Will the position include having to address large groups of people?
- What types of support systems will be in place to help me be successful in this role?
- Describe the leadership style of the person to whom I will be reporting

STRESS BEHAVIOR

NEGATIVE BEHAVIOR EXPERIENCED WHEN FRUSTRATED

Stress Behavior results when our Needs are not being met. Although it is completely natural for Stress Behavior to occur, it is often seen by others as negative, ineffective and quite costly in human terms.

Stress Behaviors in the Yellow quadrant include:

- Become over-insistent on rules
- Resist necessary change
- Are reluctant to confront others
- May be taken in

When frustrated and under stress, you may:

- Be over-controlling
- Become resistive to change
- Conform to prevailing thoughts
- Become quietly resistive
- Appear rigid

To manage this stress behavior when it occurs:

- Set proactive agendas that are yours rather than reacting to agendas set for you
- Experiment with small changes in plans so you can more readily adapt to larger changes
- Practice new, cutting-edge approaches on familiar tasks
- Avoid withdrawing to avoid conflict, express your thoughts persuasively
- Risk a little by trying new innovative approaches
